## INTRO

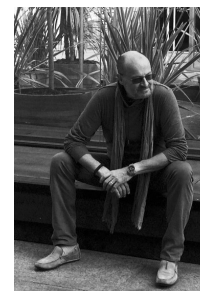

Clavis working table system is composed of a series of modular structural elements connected together by a patented joint, heart of the project. The coupling and the 45° rotation of the elements allow an easy and tool-free frame assembly.

Thanks to its modular components Clavis is a system adaptable to multiple applications and configurations: from single desks to multiple benches to standing workstations.

A universal clamp allows to equip the tables with a series of multifunctional accessories. The systems is enriched by screens in various materials, modesty panels, shelves and drawers in metal available in several colours (white, dark grey, light grey, brick red, bottle green), granting a high level of customization.

Clavis allows the integration of io.T, The Intelligence of Tecno, creating advanced and interconnected workspaces. Integrated sensors in the table activate functions to serve users and send information in real time, allowing resources optimization.
