Hortus

INTRO

The archetypal outdoor bench that enriches interior architecture.

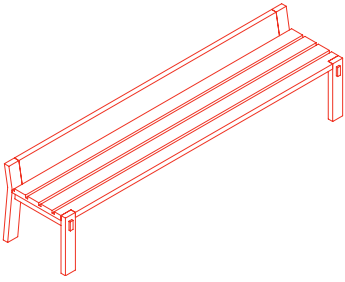

Minimalist and light, as a unique piece or combined in series, it is the archetype of outdoor seating that moves into the interior design, distinguishing it with its disruptive aesthetics. An invitation to sit and experience waiting and meeting in a new and natural way, as in the open air in a park, thus relieving areas of rest and refreshment, lunch or coffee breaks, and even dividing and breaking up areas for intensive work. Hortus is a single-piece bench with a classic, archetypal flavour.
