## INTRO

The P08 folding chair first appeared in 1991 as a result of collaboration between the Centro Progetti Tecno and German designer Justus Kolberg. The aim of the project was to create a new, folding chair for conference rooms. The result was an easy to assemble seating system with a particularly slender, essential form.

The structure consists of satin finished stainless steel plates. The seat and backrest are in black painted polyamide (nylon). Conference room seating can be laid out quickly and easily thanks to the system's efficient attachment system, and stacks of up to 6 chairs can be fixed to the walls using dedicated hooks.
