INTRO

As can be expected of a company that indissolubly combines work and life, public and private, Tecno is continuing to explore and develop practical objects by extending a classic product's characteristics of transversality and flexibility to new versions.

Plau was designed by Gabriele and Oscar Buratti starting from a single surface, cut, folded and upholstered to form an armchair. The design is characterized by ease of use and a striking but elegant visual impact. It is also versatile enough to find uses in the home and in the work environment, in contract supplies, meeting areas, waiting rooms and lounges.

For 2014, Tecno is introducing new supports and new upholstery finishes for the Plau chair. With greater lightness in mind, a new version with a metal base has been created to complement the original design with its floor length sides. Two variants are available: with 4 cast spokes in polished or painted cast aluminum, with or without wheels, and with 4 legs in bent, chrome plated and painted metal.
