The workplace
as a convincing
destination.

Tecno

In a few year - as we have all seen - the world of work has undergone huge changes. It has become more transversal, delocalised, fluid. Offices are no longer simply physical containers to accommodate people, but a multi-purpose space where simultaneously converge different activities and needs. There is an acute need for more open and welcoming work environments designed to accommodate flexible work flows and functions, but which also convey a strong identity, making people feel they belong to a group. Spaces designed to promote individual and collective wellbeing, which offer more on an emotional level, too, compared to a virtual, externalized workplace.

This is a challenge that we at Tecno chose to take up.

A space for

processing

Solutions for open spaces

A space with a home-effect feeling, welcoming and comfortable but efficient. It stimulates discussion and cross-fertilization, to drive the exchanging of ideas and foster community.

Solutions for open spaces

3

1. Lighting and ventilation
The lighting and ventilation unit are hosted in the ceiling. The light source, a high-performance LED, is fully dimmable in intensity. The ventilation system is silent, energy efficient and adjustable from 0-400 m³/h. Wiring is completely concealed and only electrical connection is required to activate the system.

2. Shelves and storage units
The solid partition is available with horizontal slats, and can be equipped with shelves and storage units.

3. Aesthetic continuity
The innovative flush coupling system dematerializes the structure, making the glass and panels appear to be suspended to ensures visual continuity between materials of different thicknesses and finishes, even alternating with each other (glass, wood, metal, fabric plasterboard).

4

5

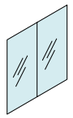
6

4. Room reservation monitor
The integration of the external monitors at the entrance allows the booking of private offices or meeting rooms.

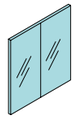
5. Video conference
Upon request, it is possible to set up a dedicated frame for video conference monitors (up to 65”), as well as a dedicated all-in solution complete with monitor and audio-video systems, fully integrated in the partition.

6. Accessories and Technology
Within the partitions it is possible to accommodate, in a total thickness of 80mm / 3 1/5”, various technological systems including curtains, accessories and even monitors from 10” for room reservation up to large 65” video-conference monitors. Cables, equipment and technical elements such as thermostats, electrical controls and power sockets can be concealed, thus remaining completely enclosed.

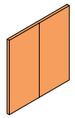
Options:



Single-glazing
Can be equipped with different glass thicknesses or laminated acoustic glasses, graphics films or LCD with On/Off effect.



Double-glazing
Can be equipped with different glass thicknesses or laminated acoustic glasses, graphics films or LCD with On/Off effect, curtains and LED lighting.



Solid
Can be fitted with shelves, hanging cabinets and concealed cable management, available in melamines, woods or fabrics.

Mod. refers to model.
For details and measurements please refer to the technical sheet.

Configurations

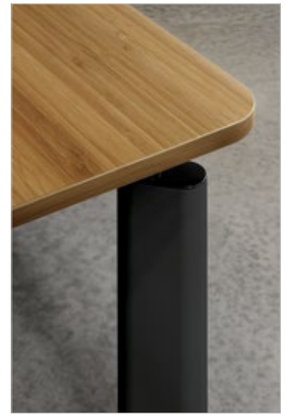
The few essential and modular elements create endless possibilities that can be reconfigured or modified over time.

9. Single equipped desk, with return top, optional modesty panel.
10. Meeting tables - round, square and rectangular - can be multiplied infinitely to create customized lengths.
11. Workstations with optional accessories, containers, meeting areas, in line desks, dividing screens, return tops and end tops.
12. Sit-stand table.
13. Height-adjustable extends from sitting to standing and all intermediate adjustments with millimetric precision.



Finishes

1. Etched back-painted glasses and woods elevate the collection to create simple and refined semi-directional solutions.
2. Neutral tones offer essential and effective solutions for working areas.
3. Wooden tops characterize small meeting areas in a warm and natural way.
4. Colors, in an ultra-resistant textured finish, as an identity element for dynamic spaces.

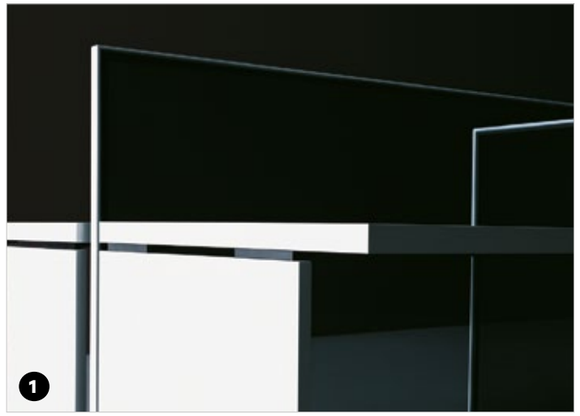
Concealed cable management

Power supply



1. Rationality
The slender base panel supports the worktop with a slight gap, to lighten and streamline the entire image of the product.

2. Modularity
The heart of the system is the solid top that houses a series of bushings, completely concealed. The freedom of composition and the versatility allows for a wide range of solutions that can be reconfigured over time.

3. Wired
A central top access allows the distribution of cables and with ease of accessibility for devices.

Configurations
The modular system is based on the logic of a reduced number of components, which are very versatile and can be repeated and combined with each other: rectangular or round tops, support angles, panel bases, dividing screens, containers, shelves on the top and accessories for electrification.

5. Single desk, with optional return top.

6. Workstation with electrification.

7. Meeting table with electrification.

8. Round table with height-adjustable column base.

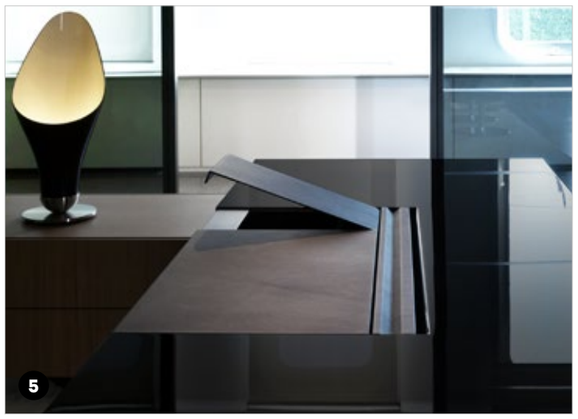
Concealed cable
management

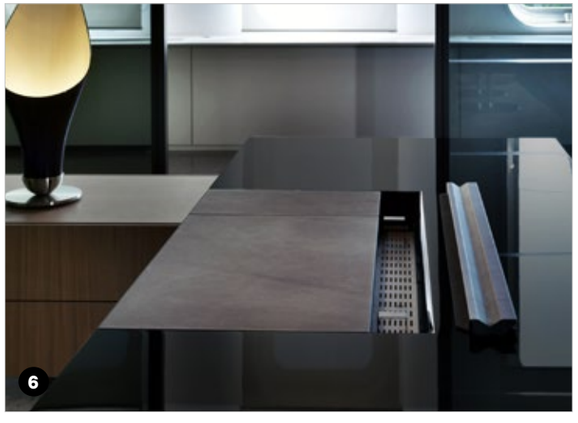
Power supply

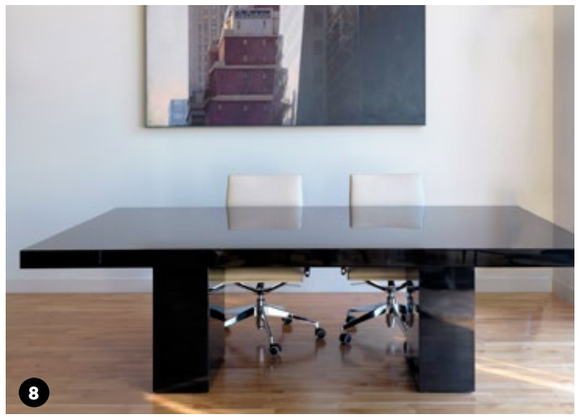
A collection of meeting tables and executive desks that elevates the quality of craftsmanship to a more contemporary idea of technology, concealed in pure, minimal forms, held in a precise and rarefied balance.

1. 2. Excellent finishes
The tops in wood or lacquer and the bases in lacquer, wood or marble can be freely combined.

2. 6. Concealed wiring
The cables run inside the support bases and the side container, while the sockets are immediately accessible by sliding the meeting tables top or inside the service compartment of the desk.







7. 8. Rectangular Meeting
The two bases, differing in length and width from each other, harmoniously follow the asymmetrical shape of the table, with only one corner actually at 90°.

9. Desk
The desk cantilevers over the container for a elegant and slender effect. The floor wiring runs inside the side container, while the sockets are immediately accessible inside the personal service compartment recessed into the desk. The compartment also serves as a leather-finished desk top and extra personal space.

10. Oval meeting
The asymmetrical shapes rests on the cylindrical base shifted eccentrically towards the edge. The irregular sections are connected by elegant metal joints for a unique graphic effect.

Cento

The collection consists of storage or bookcase units in 3 modular heights that can be combined with hinged doors, small drawers, single large drawer or simply open shelf.

Minimal and without strong characterizing elements, the product is recognizable at first sight thanks to the high level of craftsmanship with traditional wood craftsmanship techniques.

Storage units

Craftsmanship

Modular system

T334-T335

Iconic design

Craftsmanship

Concealed cable management

Round and oval table available in 3 different sizes and two different top heights, high and low, together with a special ultra-low coffee table version.

1. Excellent finishes
Tops in high quality gloss lacquered.

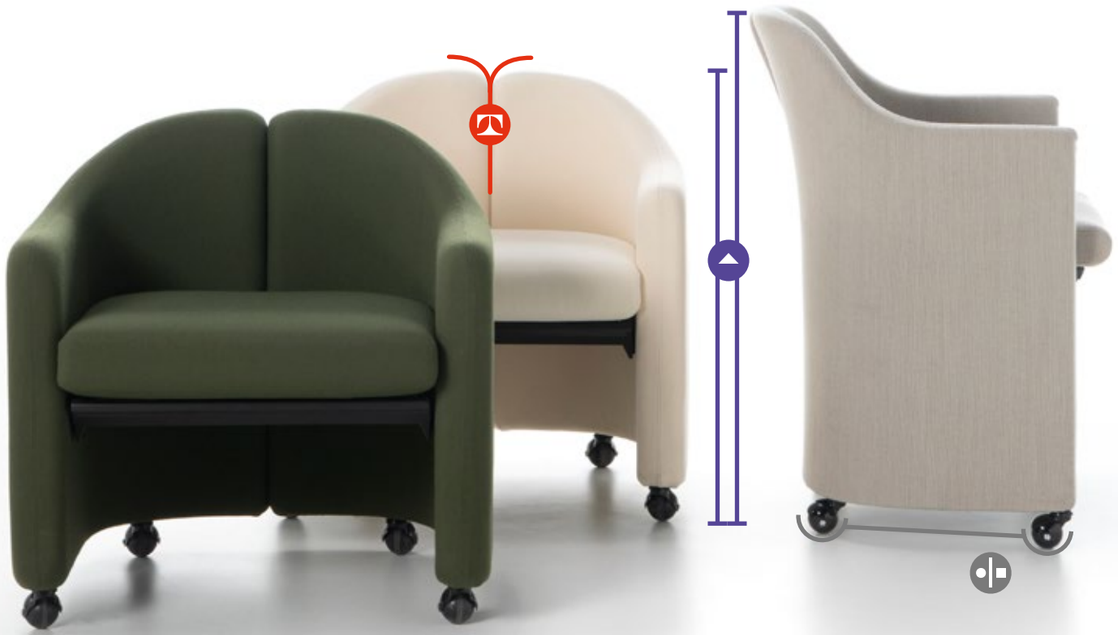
2. Legs
The legs are optionally twinned, to increase stability and enrich the design in large custom-made boardroom tables.

3. Tops
The tops are formed from circumferential portions connected by delicate aluminum joints, for a rigorous design with a strong personality.

4. Concealed wiring
The wiring runs along the leg reaching the top accesses, which are in the same finish of the top.

The table are available in two heights: the lower version further emphasises the length and grandeur of the product, fitting perfectly with the horizontal layouts of the modern offices, together with matching chairs, with lower height and more welcoming. The taller version, meanwhile, match standard height chairs for a desk feeling.

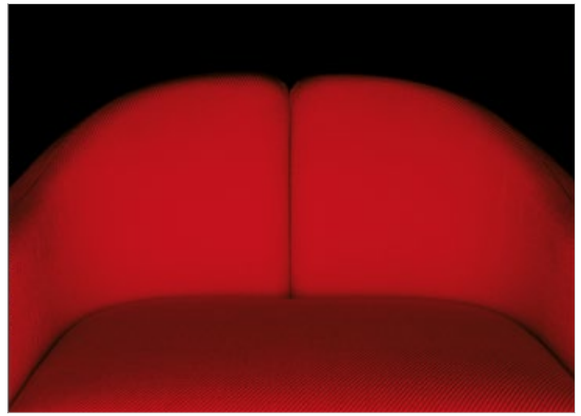
PS 142

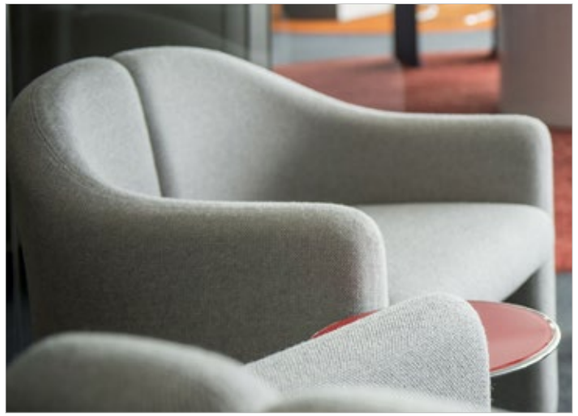


Iconic design

Two heights

On feet or casters





Graphic and characterizing armchairs, in a higher and more sustained version, for a table or meeting, or a lower and more enveloping version, for sitting, waiting or conversation.

The distinctive element is the central cut that makes the backrest, already soft and supported, also flexible and adaptable to the posture of the users.

Tecno

We draw on our specific sector experience without being afraid to change, innovate and evolve; to respond to today's needs with tomorrow's solutions. We make technology more human, closer to the actual needs of workers. Naturally, we design responsive furnishings, flexible structures, and integrated systems. Most importantly, we create solutions that help people feel closer to each other, to the work they do, to the goals they need to achieve and to the company's values.

And for us, this is the most important achievement.
