in the heart of New York.

Tecno USA

Tecno USA

Tecno International N.A., the official U.S. branch of Tecno, is reinforcing its commitment to innovation and leadership in the American market.

With its design headquarters in the heart of Midtown New York and a manufacturing facility in New Brunswick New Jersey, Tecno International N.A. supports architects and constructors in bringing projects to life across all the U.S.A.

Renowned for its sophisticated, design-forward furniture solutions, Tecno International N.A. leads in the creation of high-performance furnishings, partitions, and seating systems. By combining elegance in form with precision in production, Tecno consistently delivers on its promise of superior quality and innovation.

With its main manufacturing facility in New York and a branch in Chicago, Tecno is a full-fledged partner for prestigious American projects — serving tech firms, law firms, real estate developers, building owners, co-working spaces, distributors, furniture dealers, independent representatives, and top architecture firms such as Gensler, Diller Scofidio + Renfro, FXFowle, and A+I.

Installations across the country showcase Tecno's leadership as a one-stop shop for architects, developers, and contractors seeking custom solutions for the workplace, public buildings, and the home.

Notable projects include furnishing 55 Hudson Yards Financial, Boston Consulting Group, Guardian Life, Common Grounds, Moleskine, Safilo, New York Library and New York University, Hearst Tower and many others.

Custom Design & Engineering

Design and technical consulting for the creation of custom furniture and spaces, covering all commercial, retail, and hospitality environments.

Commercial Interiors

Comprehensive design and technical support to create high-performance, functional, and sustainable workspaces that are perfectly tailored to the space's intended use and identity.

Project Promotion

Support and technical advice for structuring presentation pitches, including the development of clear and compelling proposals to win over all decision-makers.

Change Management

Facilitating collaborative workshops on workspaces and third places to foster team buy-in and support evolving work practices.

Tecno International N.A.

Designing the future means investing — which is why Tecno has always partnered with designers, engineers, and developers to create projects and solutions that truly make a difference. Our approach is rooted in listening to all stakeholders, because through dialogue, we don't just develop products or interiors — we craft a complete experience of work life and the relationships that shape it.

The main office is strategically located in Midtown Manhattan, in the city's nerve center known as a landmark area and home to the Empire State Building, it is famous for its skyline, with a vast number of towering buildings. It is therefore no accident that the company chose this location as its design space and innovation hub.

In 2024, the company expanded its team in Manhattan and partnered with a new production facility in Connecticut. Building on the rapid expansion of its New York headquarters, in July 2025 the company has launched a new production facility in New Brunswick, New Jersey, underscoring its dedication to American craftsmanship and industrial excellence and strengthening Tecno International N.A.'s presence in the U.S. market.

Our demountable partitions and integrated custom wood solutions are now delivered in half the usual time — 48 hours for laminated glass (featuring high acoustic performance and field-cut capabilities) and 6 to 8 weeks for extrusions and door components.

About us

Tecno.

A name, an adjective, a way of life.

The word we've chosen to express who we are.

We were Tecno when technology wasn't such a standard choice, when analogue intelligence and design were the tools used to incorporate tech into the things around us.

And we're still Tecno today.

When building a smart world means designing flexible systems, responsive furniture and spaces designed to fit humans like a glove.

We're Italian. But our tables, storage solutions, chairs, partition walls and desks will make you feel at home wherever you are in the world.

We work with Pritzker Prize-winning architects, multinationals, niche companies, museums and institutions. Our design approach starts with a discussion of an idea on the telephone, with futuristic sketches done on a piece of paper, with the dreams of our managers. In collaboration, always.

We see ourselves as a "design" company. Because we believe that design isn't just about form, but substance too. It's about creating beautiful, long-lasting, easy-to-use and ingenious solutions, combining artisanal and industrial production savoir-faire with tech expertise and accepting tomorrow's responsibilities today.

That's the essence of why we're called Tecno.
