

Aura

**Aura** è una seduta che favorisce il pensiero e la meditazione.

In una realtà sempre connessa e orientata alla condivisione, la forma avvolgente della scocca contribuisce a creare un'area di privacy, suggerendo una sensazione di riservatezza e favorendo la concentrazione all'interno degli spazi co-working, le lounge, gli uffici open space, le situazioni home-office, così come nei luoghi collettivi e negli ambienti pubblici.

Lo studio delle forme e la precisione ergonomica rendono la seduta confortevole e accogliente; il progetto esprime l'eleganza tecnica e i contenuti tecnologicamente avanzati, distintivi di Tecno, attraverso la scelta dei materiali e dei processi produttivi.

2018**

**Aura** is a chair that favours thinking and meditation. In a modern-day society that is constantly connected and geared to sharing, the enveloping shape of the shell helps to create a private space, favouring a feeling of privacy and aiding concentration in co-working spaces, lounges, open-plan offices and home offices, as well as in community and public places.

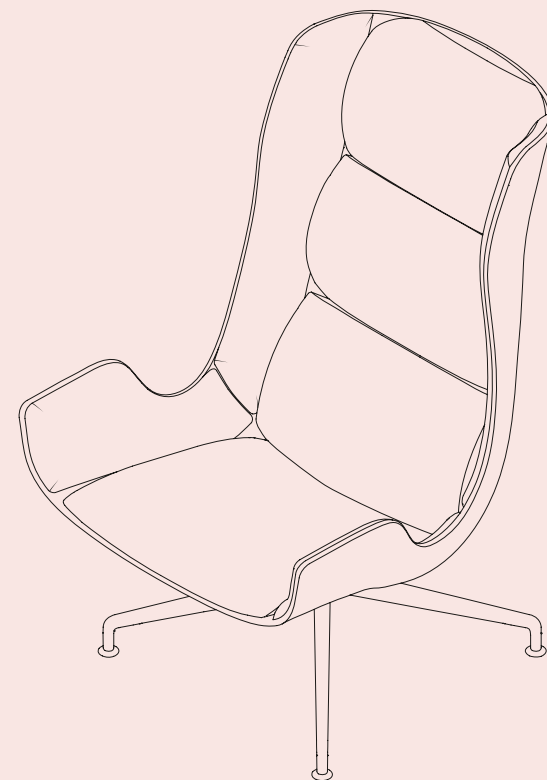

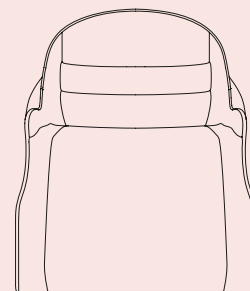

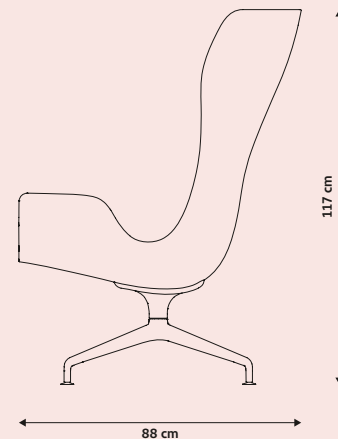

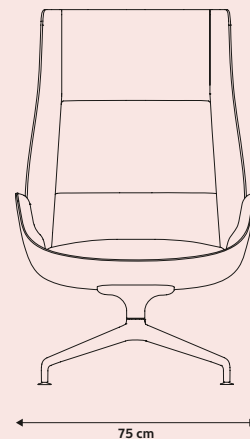

The carefully studied shapes and precise ergonomics make the seat comfortable and welcoming; the design expresses Tecno's hallmark technical elegance and technologically advanced content through the choice of materials and manufacturing processes.

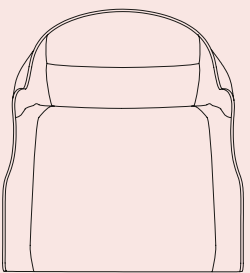

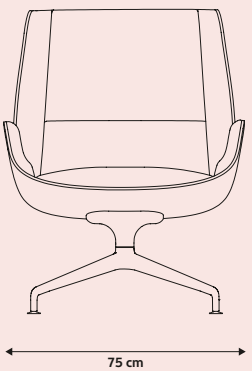

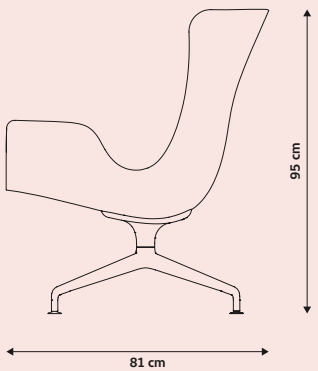

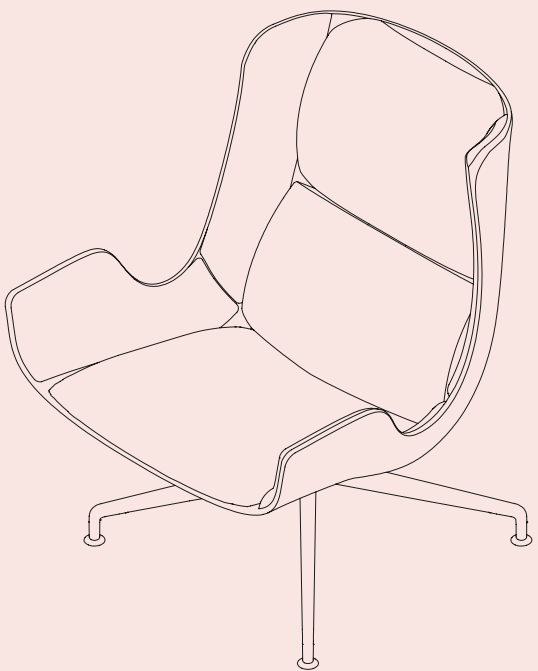

La poltrona, con base in pressofusione di alluminio verniciato, è costituita da una monoscocca in metacrilato monosatinato, disponibile nella palette cromatica dedicata o con colore a richiesta. L'ampio cuscino interno di rivestimento, strutturato in zone a portanza differenziata, è studiato per garantire il mantenimento della corretta linea ergonomica favorendo il massimo confort della persona.

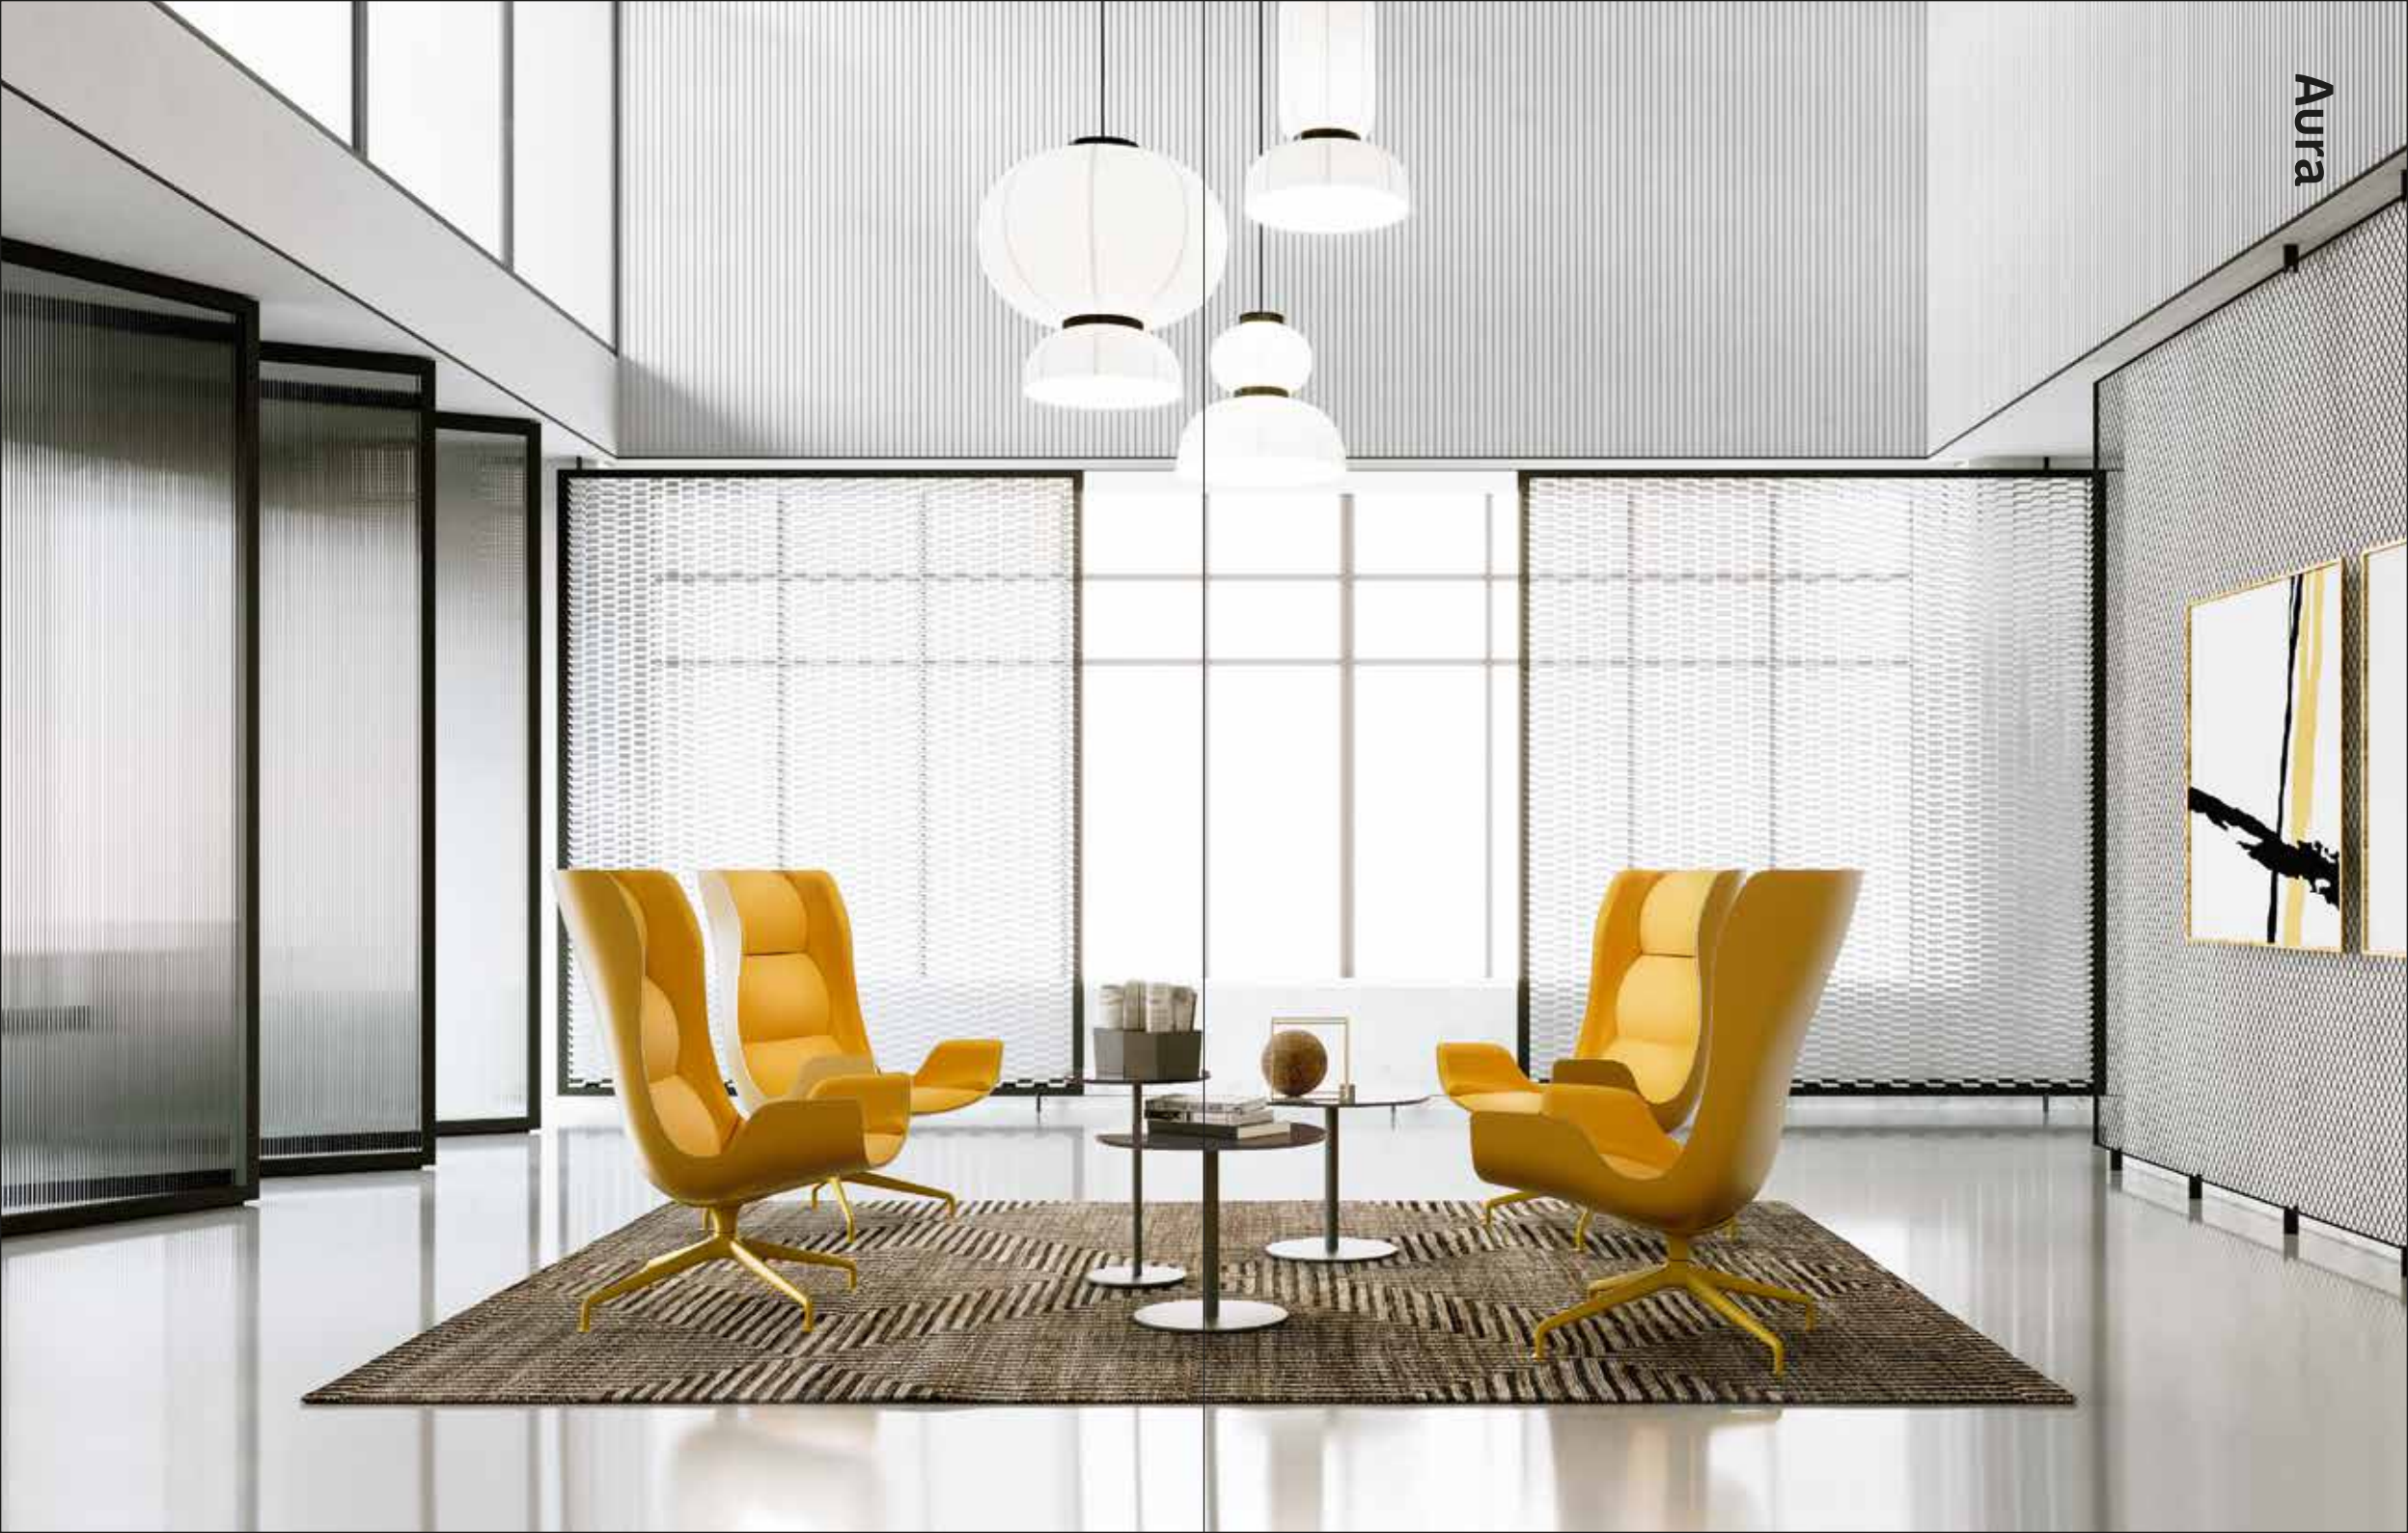

**The armchair, with a pressure-casting aluminium basis, is comprised of a mono-satin methacrylate monocoque shell, which is available in a dedicated range of colours or specific colours upon request. The ample cushioned liner incorporating differentiated support zones is designed to guarantee the correct ergonomic sitting position for optimum user comfort.**
