Alis

Tecno & Zaha Hadid Architects

Tecno & Zaha Hadid Architects

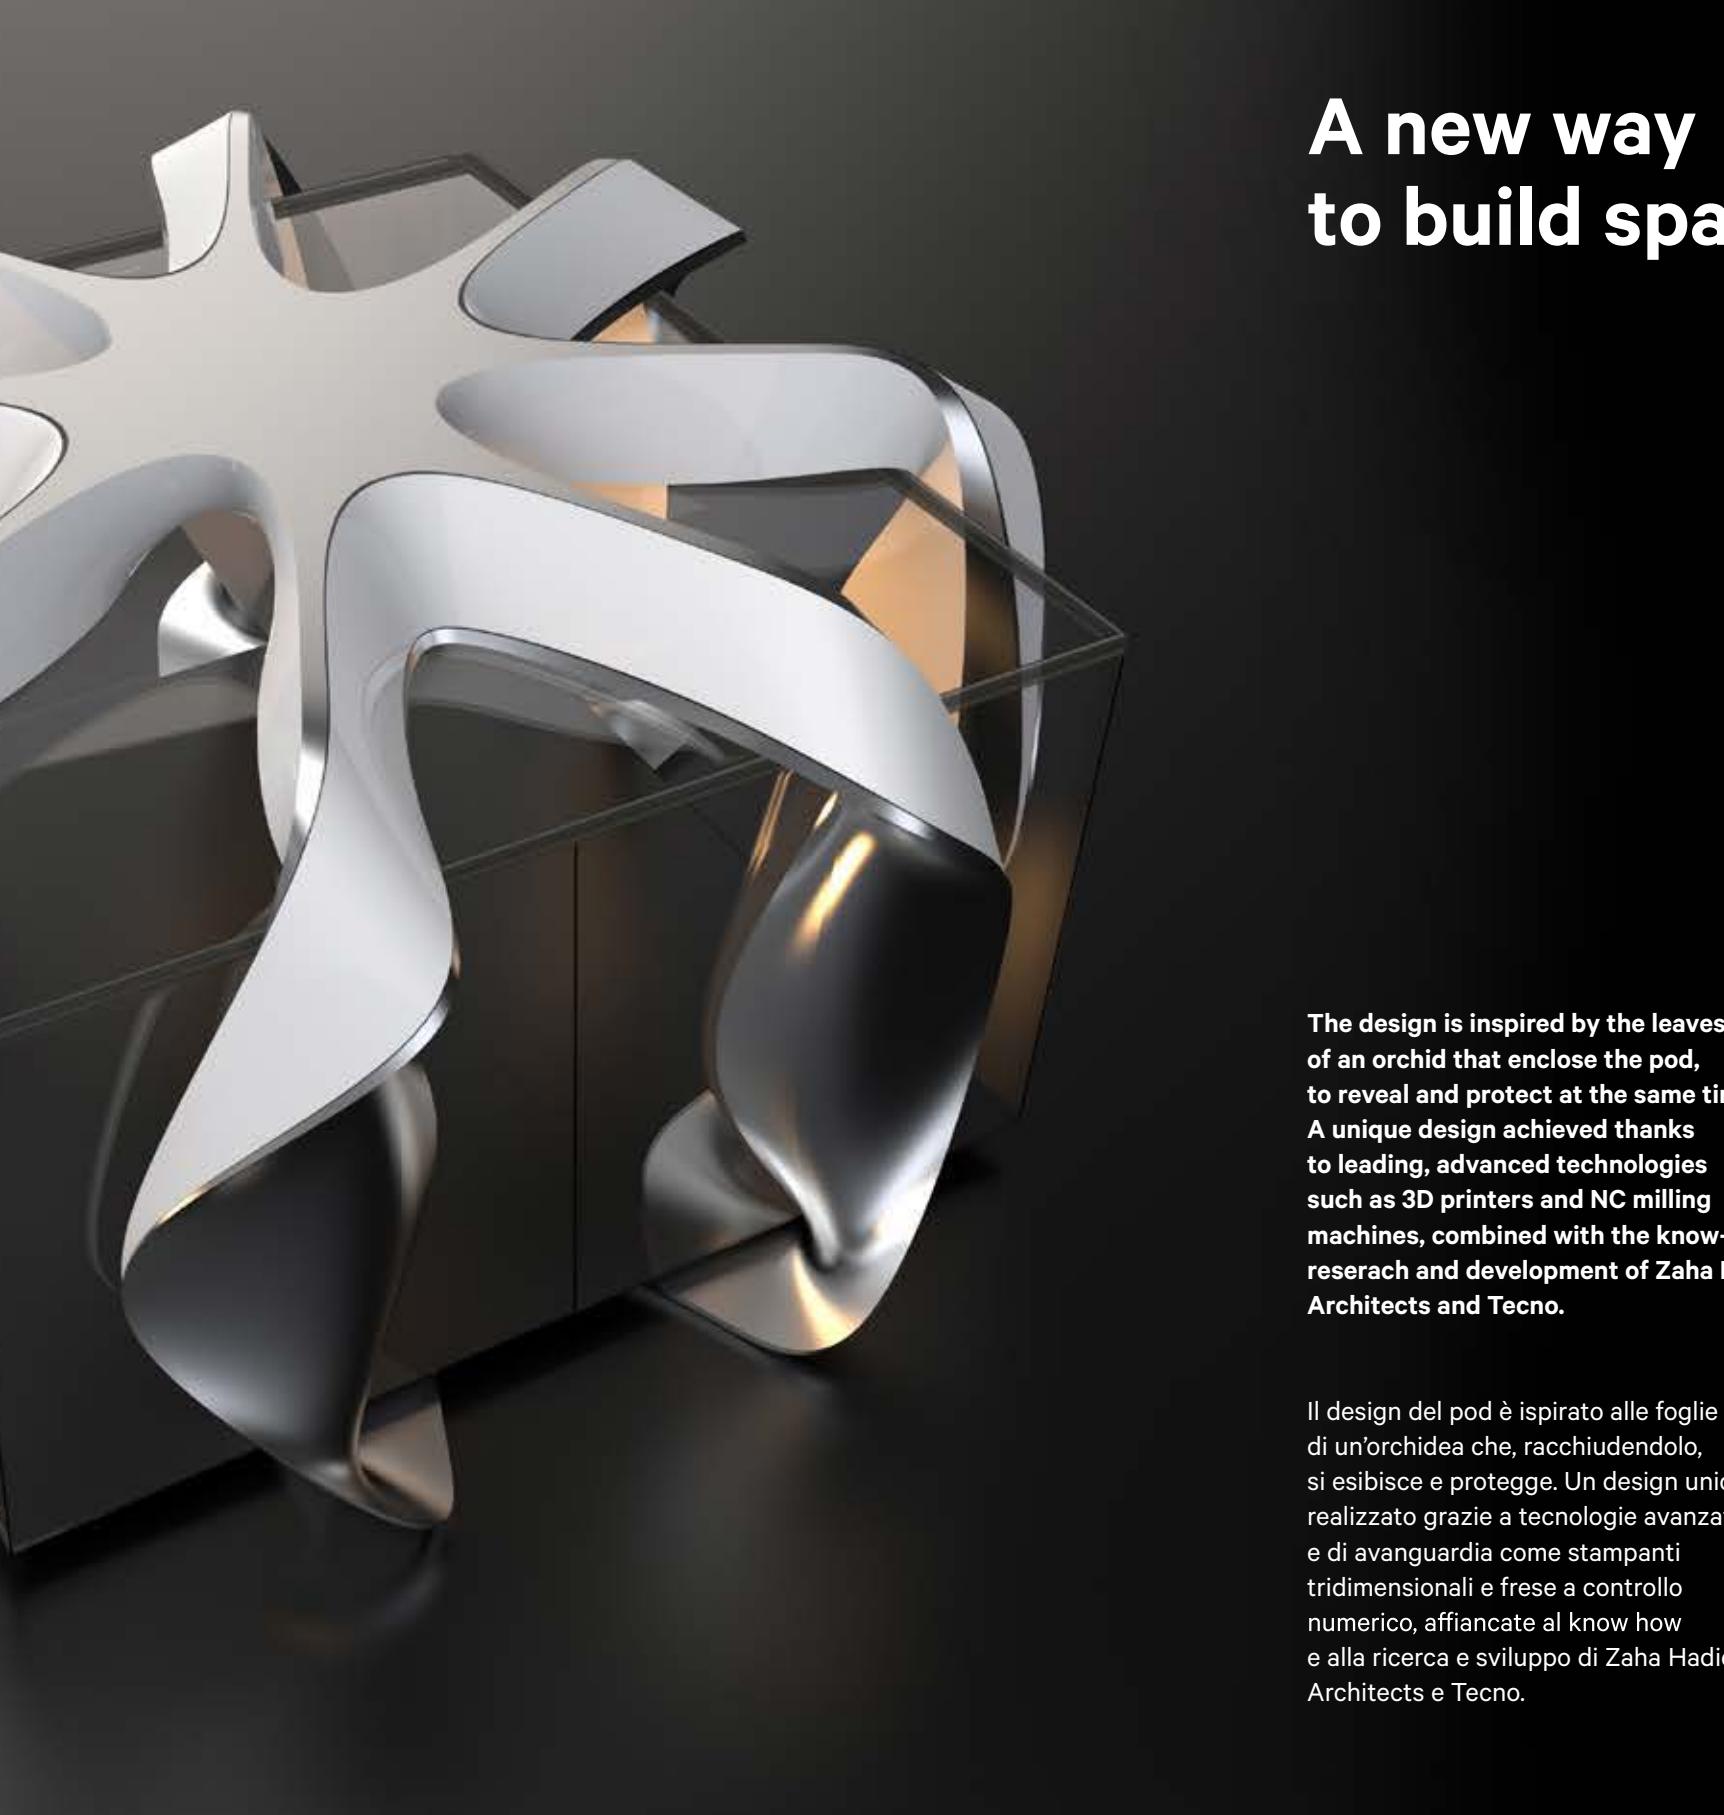

Alis is the answer to the new demands: a pod designed to increase collaboration and team working. It goes beyond the contemporary workplace to redefine what will be the one of the future, featuring flexible spaces alongside meeting rooms equipped with the latest technology.

Alis è la risposta alle nuove esigenze: un pod concepito per incrementare collaborazione e team working. Il superamento del workplace contemporaneo per ridefinire quello che sarà il luogo di lavoro del futuro, dove spazi flessibili si affiancheranno a sale riunioni attrezzate con le tecnologie più innovative.

“
Alis redefines the concept of social interaction with an innovative and unique pod, a place where you can be limitless-connected.
”

Alis ridefinisce il concetto di interazione sociale con un pod innovativo ed unico, un luogo dove connettersi senza limiti.

A new way to build space

A mobile pod that can be installed in different settings, both indoors and outdoors, in offices and commercial spaces, stations and airports. Alis creates an instant meeting room that can be customized according to the needs of its users.

The design is inspired by the leaves of an orchid that enclose the pod, to reveal and protect at the same time. A unique design achieved thanks to leading, advanced technologies such as 3D printers and NC milling machines, combined with the know-how, research and development of Zaha Hadid Architects and Tecno.

Il design del pod è ispirato alle foglie di un'orchidea che, racchiudendolo, si esibisce e protegge. Un design unico realizzato grazie a tecnologie avanzate e di avanguardia come stampanti tridimensionali e fresa a controllo numerico, affiancate al know how e alla ricerca e sviluppo di Zaha Hadid Architects e Tecno.

Un nuovo modo di costruire lo spazio

Il pod è mobile e può essere installato in diverse ambientazioni: spazi interni ed esterni, uffici, luoghi commerciali, stazioni e aeroporti. Alis crea una sala riunioni istantanea che può essere personalizzata a seconda delle esigenze dei suoi fruitori.
