## INTRO

Il sistema di tavoli da lavoro Clavis si compone di una serie di elementi strutturali modulari che si uniscono tra loro grazie al giunto brevettato, cuore del progetto. L'innesto e la semplice torsione a 45° degli elementi garantiscono un assemblaggio veloce e "tool free".

Grazie ai suoi componenti Clavis è un sistema adattabile a infinite tipologie ed applicazioni: configurazioni che vanno dal tavolo singolo alle workstation multiple e alle postazioni di lavoro in piedi. Un morsetto universale permette di equipaggiare i tavoli con una serie di accessori multifunzionali. Completano il sistema modesty panels, mensole, cassette in metallo che grazie alle loro diverse varianti di colore, bianco, grigio piombo, grigio light, rosso mattone e verde bottiglia, permettono un ampio grado di personalizzazione.

I piani di lavoro, oltre che nella loro versione in melaminico, sono inoltre disponibili nella finitura laccata opaca, in cristallo e legno consentendo a Clavis di essere utilizzato anche in ambienti semi-direzionali.

La possibilità di integrare l'intelligenza io.T consente a Clavis di creare ambienti di lavoro evoluti e interconnessi. Sensori integrati nei piani di lavoro attivano funzioni al servizio dell'utente e inviano informazioni in tempo reale permettendo così l'ottimizzazione delle risorse.
