Nomos System

INTRO

Nato dalla collaborazione tra Norman Foster e l'esperienza tecnologica di Tecno, Nomos sistema è disegnato per ottenere una flessibilità pressoché infinita di soluzioni per gli spazi di lavoro, esaltando la resa estetica dell'ambiente. Versatile ed estremamente resistente, il sistema Nomos è considerato pioniere di tutti i sistemi a struttura condivisa e icona riconosciuta dell'industrial design.

Il sistema con la sua gamma di elementi offre la possibilità di realizzare composizioni di diversa lunghezza e profondità per soddisfare le molteplici esigenze degli spazi lavorativi, dalle postazioni individuali ai grandi tavoli meeting, passando dalle più attuali soluzioni di lavoro in desk sharing.

Una struttura tubolare in metallo, come una spina centrale, è il punto di partenza del sistema, alla quale sono aggiunte gambe, piedi, supporti, superfici di lavoro, sovrastrutture e schermi. L'elettrificazione verticale sfrutta una vertebra snodata in materiale plastico, agganciata alla struttura. Una canalizzazione modulare in lamiera forata verniciata, permette il passaggio dei cavi sottopiano.

Tra le finiture proposte per le basi, oltre al cromato, sono disponibili anche le verniciature in colore bianco e grigio piombo, in abbinamento ai piani aggregabili in laminato a forte spessore o laccato bianco o grigio piombo; le essenze, disponibili per i piani scrivania e i piani di servizio, sono trasversali a tutta la collezione. Conferiscono eleganza i piani in cristallo temperato trasparente ed extra chiaro retroverniciato, abbinabili liberamente nell'uso con le altre finiture.
